

# COMPENG 2SH4 Project – Statement of Contribution

Your Group Number                      asim-alsoofi

Your Name                                  Nooraldeen Al-Soofi (alsoofin)

Your Team Member's Name      Hasan Asim (asimh6)

**You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:**

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.
  - **Iteration 0**
  - **Iteration 2**
  - **Iteration 3**
    - **Feature 1 (Although Hasan initially took the initiative to complete it, I reworked this feature as to remove some bugs that prevented me from working on the remaining features)**
    - **Feature 2**
    - **Feature 3**
  - **Edited the code and removed any hardcoded values and followed debugging practices.**
2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.
  - **Edited Iteration 0**
  - **Iteration 1**
  - **Iteration 3**
    - **Feature 1**
  - **Commenting**
  - **Edited code and followed debugging practices to assist with issues encountered.**
3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

**Although this isn't my first collaborated software project, this was a great experience because I had a good teammate who I was able to well communicate with. Although we had an unorthodox method of splitting the recommended workflow, it worked out well in the end because everyone was able to work on whatever they wanted without feeling they are burdened with the work of someone else. Additionally, because of how we split the load, Hasan and I consistently offered each other help to ensure that we worked effectively, and so each person knew they had a helping hand.**
